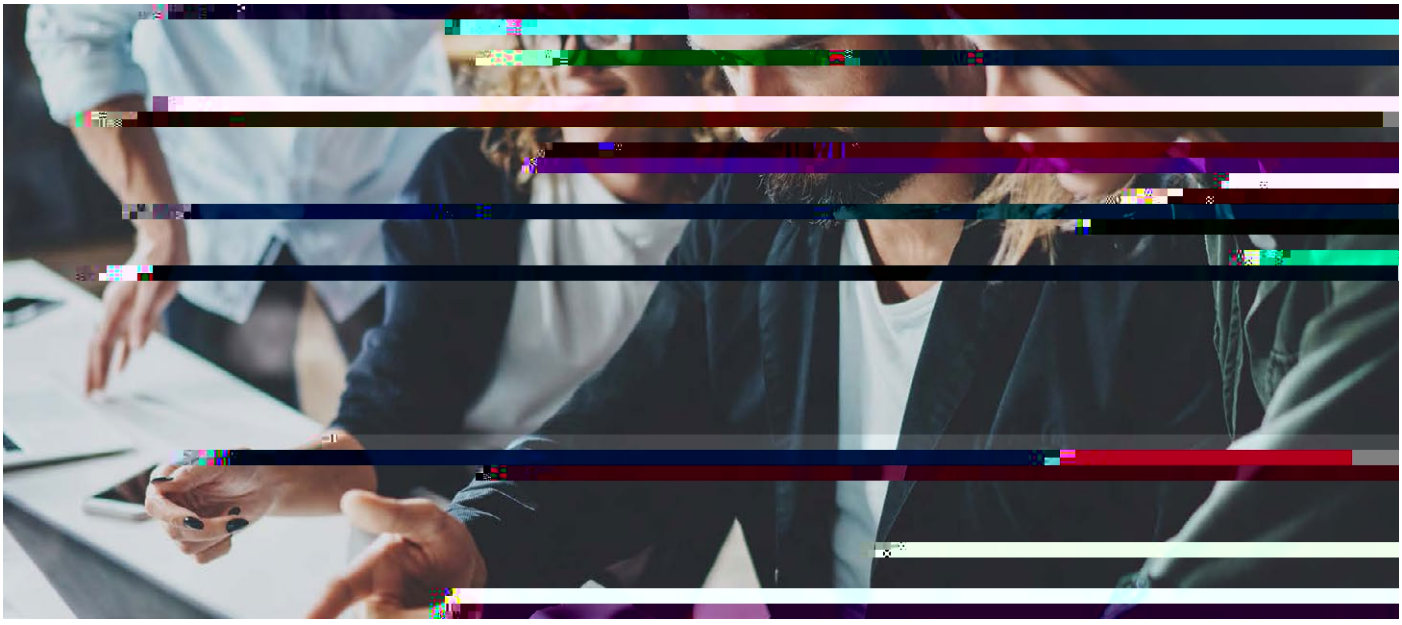
penText B2B Integration Essentials

Affordable EDI connectivity and automation for SMBs



Benefits

- Delivers **fast, easy, and affordable** connectivity
- **Increases transaction visibility**
- **Automates processes** for operations and shipping
- **Accommodates growth**

Small and medium-sized businesses (SMBs) are required to accommodate an increasing number of orders and complex digital mandates from large trading partners. Simplify EDI connectivity to major retailers with a solution that is easy to set up and provides a host of benefits that drive business growth.

By transitioning from traditional methods like email or fax to electronic data interchange (EDI), businesses can streamline operations and reap significant advantages. OpenText™ B2B Integration Essentials (simplifies and automates supply chain processes, eliminating the need for specialized EDI expertise while reducing costs, accelerating processing, enhancing transaction visibility, minimizing errors, and strengthening relationships with trading partners.

Delivers fast, easy, and affordable connectivity

User-friendly interfaces help SMBs seamlessly transition to digital connectivity and quickly onboard trading partners without requiring major resource allocation or additional staff.

Increases transaction visibility

Gain comprehensive transaction visibility and reduce errors in a single platform. Validate documents, access detailed reports, and receive smart alerts to optimize inventory planning, sales forecasting, and other business operations.

Automates and streamlines workflows

The user-friendly interface is designed to reduce the learning curve and improve overall efficiency. Automated workflows leverage data enrichment and reusability to streamline the document creation process and intelligent automated packing allows vendors to efficiently follow trading partner packing requirements.

Provides advanced supply chain capabilities

Eliminate unnecessary steps with advanced supply chain features. Cross-docking and drop shipping streamline the shipping and receiving process while enhanced pick and pack supports more complex and efficient mixtures of goods in a given shipment. Additionally, the platform supports retailer-
