

## PRODUCT OVERVIEW

# OpenText Documentum for Asset Operations

Control documentation and automate workflows for plant operations and maintenance

**Quickly access the most up-to-date asset information**

**Run projects within a common repository**

**Comply with**

ODyctEDoODTde Sgxxp™ tOkWedTcEDI

OpenText™ Documentum

helps organizations avoid the potential fines, unplanned downtime and negative publicity that result from compliance violations.

### **Configuration based on industry best practices**

Pre-built tools and templates get users up and running quickly, eliminating extensive custom programming and lengthy deployment schedules. Templates based on standards, such as ISO-9001 and ISO-55000, provide as-built document management that promotes company-wide adherence to best practices.

### **Single source of asset information**

The solution integrates with key project and maintenance management systems to provide fast and secure access to all asset information, including standard operating procedures (SOPs), technical documents, as-built specifications and drawings, project plans, spreadsheets, contracts, training documents, video and audio. This

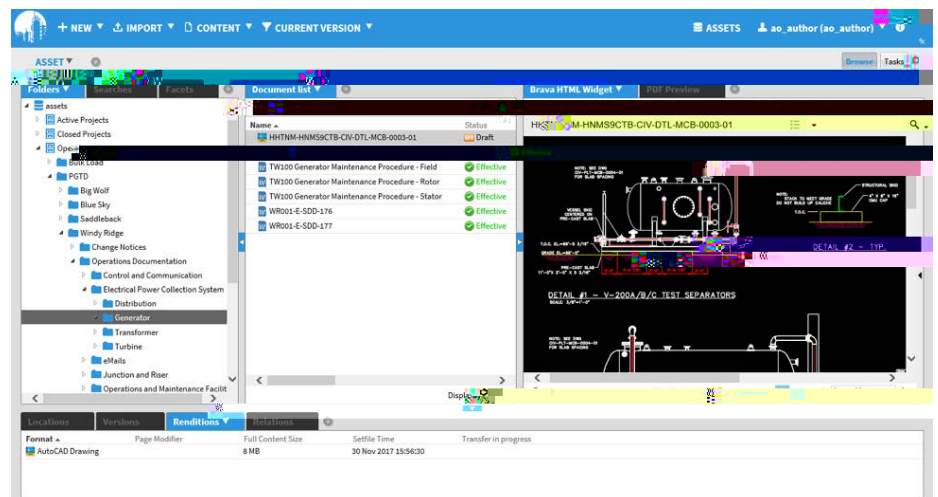

## Automation improves workflow and compliance

Documentum for Asset Operations automates workflows critical to plant operations and maintenance. Integration with OpenText™ Core for Supplier Exchange allows suppliers to securely access documents, apply revisions and return them for approval. It automatically works with descriptions, revisions and

## Reliable regulatory compliance

Incomplete, missing or inaccurate asset-related information can lead to delays and failures to comply with HSSE regulations or an inability to prove compliance during an audit or inspection. Documentum for Asset Operations ensures reliable regulatory compliance by automatically creating a full audit trail. Enforced review, electronic signatures approval, tracking and reporting. Status actions like “to be read and understood” simplify approval processes and ensure inspection-readiness.

Documentum for Asset Operations harnesses all of an organization’s scattered information into one system. Users gain control and can quickly access all asset-related documents, giving them the most up to date information, relevant drawings and SOPs. Effectively managing asset-related documents, change requests, reviews and approvals through a structured approach improves efficiency, compliance and reliability.

Brava HTML5 is fully integrated to support viewing, mark-up and consolidation during review and approval processes.

## About OpenText

OpenText, The Information Company, enables organizations to gain insight through market leading information management solutions, on-premises or in the cloud. For more information about OpenText (NASDAQ: OTEX, TSX: OTEX) visit: [opentext.com](http://opentext.com).
